July 22 | 1 p.m.

~

July 25 | 11 a.m.

Joe Dodge Lodge  
Pinkham Notch  
Gorham, NH 03581

Each participant will be certified as a  
Project Learning Tree Educator and will  
earn 30 hours of Professional  
Development credit.

## HIGHLIGHTS OF THE FORESTS OF N.H. TEACHER TOUR

Project Learning Tree's (PLT) nationally acclaimed pre-K through high school environmental education curriculum is the framework for learning more about the importance of New Hampshire's forests.

Tours combine math, science, technology, language arts and social studies with current information about forest practices, up-to-date technology, and careers.

Participants can look forward to connecting with expert natural resource professionals, networking, spending time in and learning about New Hampshire forests and ways to engage students in learning about forest ecosystems and management.

Teachers will experience award winning Project Learning Tree activities with links to the STEM and the Next Generation Science Standards that can be incorporated into the curricula with K-12 students.

Each participant will be certified as a Project Learning Tree educator and be eligible for certification of 30 contact hours.

Registration includes accommodations, all meals, transportation to and from tour stops, and educational materials to take back to the classroom.

## TOUR INFORMATION

The event begins with a half day Project Learning Tree (PLT) workshop. PLT curriculum is incorporated on our tours which will focus on long-term sustainable management of New Hampshire forests. We will visit nearby forest management areas, logging operations, and sawmills, and will have opportunities to discuss field operations and multiple use management considerations with foresters, wildlife biologists, and other natural resource professionals.

Educator Testimonials: "This was a fantastic week! The activities and setting were amazing!" "The sawmill was so cool!" Loved watching them make a tree into boards. "I've been blown away all week!" "Carbon storage and sequestration is something we can do! The most successful forests are the ones that are the most diverse." "This was the best PD I've ever been a part of. I feel like you thought of everything! "I learned a clearcut can be a positive thing." "I keep telling anyone who will listen about the tour." "Why doesn't everyone know about this?"
