

GEAR UP!

Sound Reason: Noise Impacts & Mitigation for Whales in the Salish Sea

A Virtual Workshop
April 17, 10:00 AM to 4:00 PM
This workshop is open to the public!

Featured Lectures Include:

- Dr. John Ryan, Senior Research Specialist, Monterey Bay Aquarium Research Institute on how environmental conditions affect song in whales and a second presentation on ocean noise monitoring, voluntary ship speed reduction, and the movement ecology of whales in Monterey Bay National Marine Sanctuary
- Dr. Jason Wood, Managing Director, SMRU Consulting on whether offshore wind farms and tidal turbine energy extraction really have impacts on whales
- Melanie Knight, ECHO Program Manager, Vancouver Fraser Port Authority on updates of the Enhancing Cetacean and Habitat Observation (ECHO) Program
- Gonzalo Banda-Cruz, Program Manager, Quiet Sound on updates of the Quiet Sound Program.
