Kentucky's 5th Annual Children's Environmental Health Summit

Due to concerns regarding COVID-19, this year's conference will be a series of webinars

Examining environmental factors posing a risk to the health and well-being of children in Kentucky

Objectives:

- Increase in participant knowledge regarding the environment and hazards and how they affect human health.
- Present current theoretical knowledge to enhance and expand skills for nurses, physicians, teachers, academia, and public health professionals.
- Promote competence in decision-making.
- Gain awareness of environmental exposures and how to reduce these for children.
- Understand the use of data from the Environmental Public Health Tracking Network and how this might drive policy decisions.
- Gather ideas to integrate nature and natural surrounding into any environment.
