

Fun, free online games encourage critical thinking and inspire environmental action for students in grades K-12.

Go to www.NatGen.org/classroomgames to link to EnviroPlay.

Choose individual or group; grade level (K-3rd, 4-5th, 6-8th, or high school); and topics (water, energy, geology, environmental quality).

Present the games as a fun ice-breaker during class, at after school club or scout meetings, or at community events.

Bring prizes for the winners; look for eco-friendly ones like seeds or reusable bags.

Games were developed by The Nature Generation, an environmental education nonprofit that inspires our next generation to care for the planet, and were generously funded by Luck Stone.

Students of all ages learn about their role in maintaining the delicate balance of nature and about actions they can take to keep the planet healthy. Questions supplement standards of learning and include additional information from sources such as universities, NASA, and the United States Environmental Protection Agency, Department of Energy, National Oceanic and Atmospheric Administration, U.S. Geological Survey, and the National Park Service.
